Promoting Enrichment of System of Education: Indispensable in promoting Community Well-being

Dr. Radhika Kapur

Abstract

In India, in all communities, the system of education is important. It leads to up-gradation of individuals, communities and nation as a whole. In rural communities, the system of education is in a well-developed state, whereas, in urban communities, when initiation takes place of any organization or institution, in such cases, the system of education is in an underdeveloped state. Within the course of time, progressions take place in the overall system of education. The diligence, determination and conscientiousness among individuals will render an important contribution in bringing about improvements in overall system of education. The teaching-learning methods and materials are the key that are necessary in imparting information among students in terms of academic subjects and lesson plans. On the other hand, the students also utilize these in acquiring an efficient understanding of the concepts. The educators and students are working in collaboration and integration with each other in leading to up-gradation of overall system of education. Furthermore, they are required to augment information in terms of modern, scientific and innovative methods and materials. Therefore, it can be stated, promoting enrichment of system of education is indispensable in promoting community well-being. The main concepts that are taken into account in this research paper are, objectives of promoting enrichment of the system of education, measures to be implemented in promoting enrichment of system of education and advantages of promoting enrichment of system of education.

Keywords: Academic Subjects, Education, Enrichment, Job Duties, Responsibilities, Skills, Up-gradation

Introduction

The individuals, belonging to all communities, categories and socio-economic backgrounds have recognized the meaning and significance of education. The education is regarded as the instrument that not only imparts information in terms of academic subjects and lesson plans, but also in terms of ways that are necessary in emerging into moral and ethical human beings and productive citizens of the country (Anonuevo, 2002). The individuals will contribute efficiently in the achievement of desired goals and objectives, when there will be enrichment in the overall system of education. Hence, it is necessary to augment information regarding factors that will be facilitating in promoting enrichment of overall system of education. The teaching-learning methods are regarded as the key. These are utilized by the educators in imparting information among students regarding academic subjects and lesson plans. Furthermore, students need to understand these adequately and be committed towards achievement of educational goals. Therefore, in educational institutions of all levels, information needs to be up-graded regarding measures to enrich the system of education.

The teaching-learning materials are regarded to be of utmost significance in putting into operation different types of teaching-learning methods in a well-organized and regimented manner. The individuals are required to focus on enhancement of teaching-learning materials, throughout the implementation of job duties and pursuance of educational programs. Furthermore, the individuals are required to augment their information in terms of different types of modern, scientific and innovative methods and materials (Soni, 2012). Their implementation would enable individuals to carry out their tasks and activities in a less time-consuming and efficient manner. In addition, the augmentation of technical skills is essential. These are the skills that are related to utilization of different types of technologies. The individuals need to acquire an efficient understanding of the concepts. Furthermore, they need to get engaged in regular practice. Hence, utilization of technologies will be facilitating to the educators and students in augmenting their knowledge and understanding regarding academic subjects and concepts. Therefore, the up-gradation of various types of teaching-learning materials are essential in leading to enrichment of the overall system of education.

Objectives of promoting Enrichment of the System of Education

The acquisition of education is regarded as the instrument that not only imparts information in terms of academic subjects and lesson plans, but also in terms of different types of methodologies and procedures that are necessary in leading to enhancement of overall living conditions. As a consequence of promoting enrichment of the system of education, the individuals will contribute efficiently in the achievement of desired goals and objectives. Hence, throughout the implementation of job duties within educational institutions and pursuance of educational programs, it is necessary to augment information regarding factors that will be facilitating in promoting enrichment of overall system of education. One of the important aspects that needs to be taken into account is, the individuals need to be well-versed in terms of the traits of morality, ethics, diligence and conscientiousness. Therefore, it is vital to be well-versed in terms of objectives of promoting enrichment of the system of education. These are stated as follows:

1. Being well-versed in terms of educational goals.
2. Leading to enhancement of teaching-learning methods.
3. Promoting enrichment of teaching-learning materials.
4. Promoting up-gradation of instructional strategies.
5. Utilizing innovative, modern and scientific methods and materials.
6. Honing technical skills.
7. Augmenting analytical, critical-thinking and problem-solving skills.
8. Organizing seminars and workshops.
9. Organizing various functions and events.
10. Promoting enrichment of extra-curricular and creative activities.
11. Promoting up-gradation in assessment strategies.
12. Encouraging participation of students in different types of academic activities.
13. Organizing parent-teacher meetings.
14. Facilitating up-gradation of infrastructure, amenities and facilities.
15. Formulating laws and rules.
16. Leading to up-gradation in laboratory and library facilities.
17. Promoting team-work among students.
18. Bringing about improvements in financial assistance, i.e. scholarships and grants.
19. Putting in efforts to one's best abilities.
20. Reinforcing positive viewpoints in terms of various factors, related to job duties.

Measures to be implemented in Promoting Enrichment of System of Education

In educational institutions of all levels, there are individuals in leadership positions. These individuals are required to augment their information in terms of different types of methods and procedures that would enable them to promote enrichment of the overall system of education. The individuals need to implement these methods and procedures in a positive and disciplined manner. The measures are complicated as well as manageable (Basics in Education, 2014). These are put into operation in less amount of time or can be more time-consuming. The individuals in leadership positions are required to work in collaboration and integration with other individuals in order to achieve desired goals. The main reason being, the individuals need to be well-versed in terms of their job duties, responsibilities, methodologies, approaches and techniques. Furthermore, they need to reinforce the traits of morality, ethics, diligence and conscientiousness. As a consequence, they will render an important contribution in carrying out all tasks and activities in a less time-consuming and efficient manner. Therefore, it is essential to be well-informed in terms of measures to be implemented in promoting enrichment of system of education. These are stated as follows:

Being well-versed in terms of Educational Goals

All the members of the educational institutions need to be well-versed in terms of educational goals. These are, promoting student learning; enabling them to acquire an efficient understanding of academic subjects and lesson plans; leading to their effective growth and development; augmenting knowledge, competencies and abilities; leading to enhancement of teaching-learning methods; promoting enrichment of teaching-learning materials; bringing about improvements in instructional strategies; utilizing innovative and scientific methods and materials; organizing seminars and workshops; promoting enrichment of different types of extra-curricular and creative activities; promoting up-gradation in various types of assessment strategies; encouraging participation of students in academic activities; organizing parent-teacher meetings and facilitating up-gradation of infrastructure, amenities and facilities.

After they have generated information in terms of different types of educational goals, they need to put in efforts to their best abilities in achieving them. All the members need to be well-informed in terms of job duties, responsibilities and methodologies, needed to implement these in a moral and ethical manner. Therefore, it is well-understood that possessing adequate information regarding educational goals is necessary in leading to up-gradation of overall system of education.

Leading to enhancement of Teaching-Learning Methods

The teaching-learning methods are regarded as the key in imparting information in terms of academic subjects and lesson plans. Hence, when the individuals are committed towards achievement of educational goals and promoting enrichment of overall system of education, they need to put emphasis on enhancement of various types of teaching-learning methods. These are utilized by the educators in imparting information among students regarding different types of academic subjects and lesson plans. Furthermore, students need to understand these satisfactorily and be committed towards achievement of educational goals. The academic subjects, grade levels of students, learning abilities of students, academic needs and requirements of students, educational goals and overall system of education are the major factors that would be taken into account in leading to enhancement of teaching-learning methods. Hence, in educational institutions of all levels, information needs to be up-graded regarding measures to enrich the system of education. Therefore, leading to enhancement of teaching-learning methods is regarded as one of the indispensable measures to be implemented in promoting enrichment of system of education.

Promoting enrichment of Teaching-Learning Materials

The teaching-learning materials are regarded to be of utmost significance in putting into operation different types of teaching-learning methods in a well-organized and regimented manner. The individuals are required to focus on enhancement of teaching-learning materials, throughout the implementation of job duties and pursuance of educational programs. The different types of teaching-learning materials are, books, articles, reports, projects, other reading materials, and internet. The students are making use of different apps in acquiring information in terms of different academic subjects and lesson plans. These are, Byjus, Khan Academy, un-academy and apps related to science subjects. The individuals need to put in efforts to their best abilities in carrying out tasks that are facilitating in promoting enrichment of teaching-learning materials. One of the important aspects that needs to be taken into account is, the teaching-learning materials need to be compatible in promoting student learning, achieving educational goals and promoting enrichment of overall system of education. Therefore, promoting enrichment of teaching-learning materials is one of the significant measures to be implemented in promoting enrichment of system of education.

Utilizing Innovative and Scientific Methods and Materials

The individuals in educational institutions of all levels are required to augment their information in terms of different types of innovative and scientific methods and materials. Their implementation would enable individuals to carry out their tasks and activities in a less time-consuming and efficient manner. Furthermore, these will be compatible in promoting student learning, achieving educational goals and promoting enrichment of overall system of education. Hence, in educational institutions of all levels, it is necessary to put emphasis on enhancement of these methods and materials. The different types of innovative and scientific methods and materials are, charts, graphs, maps, designs, models, structures, pictures, images, tools, devices, equipment, machinery and various types of technologies. The individuals need to be well-equipped in terms of various concepts. Furthermore, they need to get engaged in regular practice. This will be facilitating in carrying out all tasks and activities in a well-organized manner and generating desired outcomes. Hence, it is well-understood, utilization of innovative and scientific methods and materials are the key in implementing tasks and activities satisfactorily. Therefore, utilizing innovative and scientific methods and materials is an expedient measure to be implemented in promoting enrichment of system of education.

Honing Technical Skills

The augmentation of technical skills is essential, when the individuals are putting emphasis on leading to up-gradation of overall system of education. These are the skills that are related to utilization of different types of technologies. These are, computers, lap-tops, I pads, scanners, printers, photo-copiers, audio-visual aids and so forth. The individuals need to acquire an efficient understanding of the concepts. Furthermore, they need to get engaged in regular practice.

Hence, utilization of different types of technologies will be facilitating to the educators and students in augmenting their knowledge and understanding in terms of all types of academic subjects and concepts. The individuals need to be well-equipped in terms of various concepts. Furthermore, they need to get engaged in regular practice. These will be facilitating in honing technical skills. The technologies are utilized to put into operation effective communication processes. Through utilization of internet, individuals will augment information regarding different subjects and concepts. Furthermore, they are able to obtain answers to all types of questions and clarify their doubts. Therefore, honing technical skills is an essential measure to be implemented in promoting enrichment of system of education.

Organizing Seminars and Workshops

The educators in educational institutions of all levels need to put emphasis on organizing seminars and workshops. When they form the viewpoint that students and other members need to be imparted information in terms of a certain topic, they organize seminars and workshops. These are organized for one or two days, two weeks, or even a month. The members of the educational institutions are required to plan number of factors, i.e. time, duration, venue, program, invitations, refreshments and prospectus (Manninen, & Merilainen, 2011). In seminars and workshops, other individuals are invited from other institutions and organizations as well. They give presentations and speeches. In this manner, they are rendering an important contribution in imparting information among other members. Furthermore, putting into operation effective communication processes will be facilitating in augmenting information regarding various factors, clarifying doubts and augmenting competencies and abilities. Furthermore, students are provided with the opportunities to present their papers and hone presentation skills. They make use of technologies and reading materials. Therefore, organizing seminars and workshops is a vital measure to be implemented in promoting enrichment of system of education.

Promoting enrichment of Extra-Curricular and Creative Activities

Within educational institutions of all levels, the individuals need to put emphasis on promoting enrichment of extra-curricular and creative activities. The students need to be encouraged to participate in different types of extra-curricular and creative activities. These are, artworks, handicrafts, singing, dancing, playing of musical instruments, yoga, judo, taekwondo, role playing, dramatics and various types of sports. The participation of students in all types of extra-curricular and creative activities would stimulate their mind-sets towards learning. As a consequence, there will be an increase in motivation and concentration levels towards learning and achievement of educational goals. The students belonging to all grade levels develop interest and enthusiasm towards learning these activities. They even get enrolled in training centres apart from their educational institutions, the reason being, they form the viewpoint that when they are proficient in these activities, they will contribute in promoting enrichment of their overall living conditions. For example, individuals can emerge into professional artists, when they are good at making artworks and handicrafts. Therefore, promoting enrichment of extra-curricular and creative activities is a renowned measure to be implemented in promoting enrichment of system of education.

Promoting Up-gradation in Assessment Strategies

After the educators have imparted information among students in terms of various types of academic subjects and lesson plans, they need to encourage the participation of students in different types of assessment strategies. The assessment strategies provide information regarding whether students have acquired an efficient understanding of academic subjects and lesson plans or are experiencing setbacks. Furthermore, the educators also find out whether, they are putting into operation, teaching-learning methods and teaching-learning materials in a well-organized manner or there is a need to bring about improvements in these. Within the course of time, it is necessary to bring about improvements in various types of assessment strategies, i.e. class assignments, homework assignments, tests, exams, competitions, quizzes, and other types of academic activities. The students participate in these on an individual basis as well as in groups comprising of two or more. Hence, promoting up-gradation of assessment strategies is essential in promoting student learning and achieving different types of educational goals. Therefore, it is well-understood, promoting up-gradation in assessment strategies is a crucial measure to be implemented in promoting enrichment of system of education.

Encouraging Participation of Students in Academic Activities

Within educational institutions of all levels, the individuals need to put emphasis on encouraging participation of students in academic activities. The various types of academic activities are, debates, group discussions, presentations, role plays, speeches, and so forth.

The students participate in these on an individual basis as well as in groups comprising of two or more. The participation of students in all types of academic activities would stimulate their mind-sets towards learning. As a consequence, there will be an increase in motivation and concentration levels towards learning and achievement of educational goals. The students belonging to all grade levels develop interest and enthusiasm towards participating in these activities. The students need to be well-versed in terms of academic concepts, when they are determined to make these successful. The students, belonging to all grade levels need to be encouraged to participate in different types of academic activities. Furthermore, they need to be assisted to overcome the feelings of apprehensiveness and vulnerability. As a consequence, they will participate in these activities successfully. Therefore, encouraging participation of students in academic activities is a meaningful measure to be implemented in promoting enrichment of system of education.

Organizing Parent-Teacher Meetings

In educational institutions of all levels, it is necessary to organize parent-teacher meetings once or twice in an academic year. These are the meetings that take place among parents and teachers. The primary objective of these meetings is to impart information to parents regarding academic performance of their children. When the students are doing well and their performance is pleasing, the parents are conveyed the information. On the other hand, when students experience setbacks, they are to be assisted by their parents in overcoming them. Furthermore, ideas and suggestions are obtained from parents to carry out certain tasks, such as, promoting enrichment of teaching-learning methods, teaching-learning materials and instructional strategies; leading to enhancement of assessment strategies; achieving educational goals and leading to enhancement of the overall system of education. The parents do convey ideas and suggestions, which would be facilitating to the educators in achieving educational goals and leading to enhancement of the overall system of education. Hence, parent-teacher meetings are noteworthy to a major extent. Therefore, organizing parent-teacher meetings is a favourable measure to be implemented in promoting enrichment of system of education.

Facilitating Up-gradation of Infrastructure, Amenities and Facilities

The up-gradation of infrastructure, amenities and facilities is regarded to be of utmost significance in promoting enrichment of system of education. These are referred to power supplies, water supplies, restrooms, clean drinking water, furniture, heating and cooling equipment in accordance to the weather conditions, communication networks, transportation facilities, ramps, elevators, laboratory facilities, library facilities, play-grounds, machines, tools, devices and technologies. As a consequence, the individuals, belonging to all positions in the hierarchy will feel comfortable within the working environment. Hence, will lead to an increase in concentration and motivation levels. Furthermore, they will ensure, there are not occurrences of any types of problems and challenging situations within the course of achievement of desired goals. The management of financial, human, technical, material and information resources are regarded as indispensable in leading to up-gradation of infrastructure, amenities and facilities. Furthermore, the individuals need to be well-versed in terms of their job duties and ways of implementing these. In addition, it needs to be ensured, wastage is prevented. Therefore, facilitating up-gradation of infrastructure, amenities and facilities is a useful measure to be implemented in promoting enrichment of system of education.

Formulating Laws and Rules

In educational institutions of all levels, it is necessary to formulate laws and rules. The individuals in leadership positions are vested with the authority and responsibility of formulating laws and rules, which need to be followed by all members, belonging to all positions in the hierarchy of the educational institutions. The laws and rules are related to, utilization of technical, material and information resources; laws and rules are in computers, laboratories and libraries; laws against sexual harassment; equal rights and opportunities should be provided to all; there should not be any kind of discrimination on the basis of any factors; laws and rules regarding organization of seminars and workshops; laws and rules regarding extra-curricular and creative activities; communication processes need to take place in an effective manner; all individuals need to treat each other with respect and courtesy and one needs to carry out job duties in a moral and ethical manner. Hence, when all the members are putting emphasis on formulating laws and rules, they will render an important contribution in leading to enhancement of overall system of education. Therefore, formulating laws and rules is an advantageous measure to be implemented in promoting enrichment of system of education.

Advantages of promoting Enrichment of System of Education

In India, in urban communities, the system of education is in a well-developed state. On the other hand, in rural communities, the system of education is not in a well-developed condition. The individuals, belonging to rural communities migrate to urban communities to pursue educational goals and earn better livelihoods opportunities. Throughout the country, in both urban and rural communities, there have been formulation of programs, which are determined towards leading to up-gradation of the overall system of education. The implementation of these programs in an efficient manner will contribute in promoting enhancement of system of education, throughout the country in both urban and rural communities. The advantages of promoting enrichment of system of education are numerous. When the individuals are well-versed in terms of advantages, they will put in efforts to their best abilities in carrying out all tasks and functions successfully (Importance of Education, n.d.). These are, promoting student learning in an efficacious manner; augmenting skills and abilities; understanding academic needs and requirements of students; promoting community well-being; coping with various types of problems in an efficient manner and leading to progression of communities and nation as a whole. These are stated as follows:

Promoting Student Learning in an efficacious manner

When enhancement will take place of the overall system of education, student learning will be promoted. The students will be able to acquire an efficient understanding of academic subjects and lesson plans; lead to an increase in concentration and motivation levels; put in efforts to one's best abilities and meet the expectations of educators and supervisors. With advancements taking place and with the advent of technologies, it is necessary to make use of various types of modern, scientific and innovative methods and materials in the implementation of tasks and activities. The educators need to be well-versed in terms of academic subjects and lesson plans. As a consequence, they will contribute efficiently in imparting information among students in accordance to their academic goals and objectives. Hence, students will also be able to lead to an increase in concentration and motivation levels. Therefore, promoting student learning in an efficacious manner is regarded as one of the indispensable advantages of promoting enrichment of system of education.

Augmenting Skills and Abilities

The acquisition of education renders an important contribution in augmenting skills and abilities. The various types of skills that need to be honed are, communication skills, decision-making skills, analytical skills, critical-thinking skills, problem-solving skills, time-management skills, technical skills, creative skills, leadership skills, negotiation skills, personal skills, presentation skills, professional skills and public-speaking skills. On the other hand, abilities which need to be honed are, management, administration, convincing, persuasion, interaction, communication, emotional intelligence, systems thinking, possessing the abilities to work under stress, putting in efforts to one's best abilities and carrying out their tasks and activities in a well-organized manner. The students and other members are required to make use of their skills and abilities in personal and professional lives. Furthermore, they need to utilize these in a moral and ethical manner. Therefore, augmenting skills and abilities is one of the significant advantages of promoting enrichment of system of education.

Understanding Academic Needs and Requirements of Students

The educators need to acquire an efficient understanding of the academic needs and requirements of students. When they are well-versed in terms of these, they will contribute efficiently in carrying out their tasks and activities in a well-organized and regimented manner. The students are different from each other in terms of their learning abilities. Some students are able to understand complicated lesson plans in an appropriate manner, whereas, others experience problems in understanding even simple concepts. Hence, the educators are required to put into operation teaching-learning methods, teaching-learning materials and instructional strategies in accordance to the academic needs and requirements of students. Furthermore, the educators and students need to develop mutual understanding. The reinforcement of cordiality and amiability in terms and relationships will be facilitating in doing well in one's job duties and achievement of desired goals. Therefore, understanding academic needs and requirements of students is an expedient advantage of promoting enrichment of system of education.

Promoting Community Well-being

The individuals, belonging to all occupations, communities and socio-economic backgrounds will render an important contribution in promoting community well-being, when they will make use of their educational qualifications, competencies and abilities in an efficient manner. The individuals make selection of various fields on the basis of their interests and abilities. The different fields that are selected are, education, architecture, engineering, medical, health care, law, science, technology, business, management, administration and so forth. In all fields, the job duties and responsibilities of the individuals are put into operation with the main aim of promoting community well-being. As a consequence of promoting enrichment of system of education, the individuals will contribute efficiently in augmenting knowledge, competencies and aptitude. These are to be facilitating in promoting community well-being. One of the important aspects that needs to be taken into account is, these need to be implemented in a moral and ethical manner. Therefore, it can be stated, promoting community well-being is an essential advantage of promoting enrichment of system of education.

Coping with various Types of Problems in an efficient manner

The individuals are overwhelmed by various types of problems within the course of pursuance of educational goals. These are related to possession of financial resources; management of technical, material and information resources; academic learning; understanding of academic subjects and lesson plans; lack of extra-curricular and creative activities; lack of infrastructure, amenities and facilities; under-developed library and laboratory facilities; dilemmas in implementation of assessment strategies; lack of pioneering methods and materials and problems in the overall system of education. It is vital for all the members to be wholeheartedly committed towards promoting enrichment of system of education. As a consequence, they will be able to cope with various types of problems. Furthermore, these will be prevented from giving rise to impediments within the course of achievement of desired goals. Therefore, coping with various types of problems in an efficient manner is a useful advantage of promoting enrichment of system of education.

Leading to Progression of Communities and Nation as a whole

The individuals, belonging to all occupations, communities and socio-economic backgrounds need render an important contribution in leading to progression of communities and nation as a whole. Hence, when progressions will take place in the overall system of education, the individuals will augment their information in terms of academic subjects and lesson plans; inculcate the traits of morality, ethics, diligence and conscientiousness; augment analytical, critical-thinking and problem-solving skills; take out sufficient amount of time for all tasks and activities; overcome various types of setbacks and develop motivation towards implementation of job duties and responsibilities. The acknowledgement of all these factors will be facilitating in leading to progression of communities and nation as a whole. Hence, throughout the pursuance of educational programs and the implementation of job duties, the individuals are required to be well-informed in terms of all these factors. Therefore, leading to progression of communities and nation as a whole is a meaningful advantage of promoting enrichment of system of education.

Conclusion

In educational institutions of all levels, it is necessary to be well-equipped regarding measures to promote enrichment of overall system of education. Measures to be implemented in promoting enrichment of system of education are, being well-versed in terms of educational goals, leading to enhancement of teaching-learning methods, promoting enrichment of teaching-learning materials, utilizing innovative and scientific methods and materials, honing technical skills, organizing seminars and workshops, promoting enrichment of extra-curricular and creative activities, promoting up-gradation in assessment strategies, encouraging participation of students in academic activities, organizing parent-teacher meetings, facilitating up-gradation of infrastructure, amenities and facilities and formulating laws and rules. Advantages of promoting enrichment of system of education are, promoting student learning in an efficacious manner; augmenting skills and abilities; understanding academic needs and requirements of students; promoting community well-being; coping with various types of problems in an efficient manner and leading to progression of communities and nation as a whole. Finally, it can be stated, promoting enrichment of system of education is essential in leading to progression of individuals, communities and nation.
